The trustees believed that the community and donors wanted to see results from the foundation in its early years. With that in mind, projects have been completed and several are underway for the future. See this newsletter for more information.

Building Brick Project

Building Project Groundbreaking and Construction Begins at Chamberlain High School

The Chamberlain School District began the building project with a ground-breaking ceremony on Monday, March 28, 2016. The project is underway and scheduled to be finished by summer, 2017.

**Foundation’s Visibility during Summer of 2016**

If you plan on attending your CHS Class Reunion in Chamberlain this summer, you will see members of the Foundation’s Board of Trustees promoting their latest fundraising project. The project will be in coordination with the Chamberlain School District’s current building project.

**Progress of Outdoor Classroom Project**

The CSD Outdoor Classroom continues to have additions. The pergola is being constructed this spring with the plan of benches and an irrigation system the next projects. Perennials and trees have been planted. The Chamberlain FFA members and middle school students have been active in the construction and design of the project. As with most building projects, there have been a few delays.

The Chamberlain FFA and advisor Justin Graves, along with Adam Schroeder, CHS Architecture/Construction teacher, and his students, continually work on the outdoor classroom projects. They work to plant, care for, and groom the classroom.
